What is it? / What does it do?

Kahoot! is a game-based learning and trivia platform used in classrooms, offices and social settings.

Teachers can create a quiz ('kahoot') for students to compete in as a team or individually. Players answer the questions on their own devices, while games are displayed on a shared screen to unite the lesson. The format and number of questions are entirely up to you. There is the option to add videos, images and diagrams to your questions. Besides creating your own kahoots, you can also search among many existing games.

Students can also create their own quizzes for the rest of the class to do.
